

Heated Locker System

Howard Heated Locker System

Top food service businesses know that reduced wait times can boost their bottom line. Howard heated Stacked lockers enable a faster order hand-off and minimal “dwell time” to ensure food freshness and optimal timing of customer notifications. Our stacked lockers have individual thermostats that keep prepared food items heated or cooled to a precise temperature. Each unit is electrically controlled, with auto-locking doors, so you can be sure that each culinary delight remains fresh and free of contaminants. Howard stacked heated lockers allow customers to pick up orders in-store, curbside, or from centralized locations quickly and without interacting with store personnel. Convenient, contactless self-service in seconds is the way to go!

Streamline your workflow with contactless self-service with a Howard Heated Locker!
