

RevScan Flare

Temperature Sensing KIOSK

Howard **RevScan Flare** Wall Mount Temperature Sensing Kiosk

This Contactless Passive Detection Temperature-Sensing kiosk helps maintain a healthy environment for employees, customers, students, visitors, and the general public. Featuring a convenient wall mount design, this innovative gate-keeping solution can sense the temperature of anyone who passes through its sensors, allowing you to detect those with elevated temperatures. Designed for HR applications and ideal for businesses, schools and universities, restaurants, retailers, hospitals, clinics, and anywhere else you want to be proactive about avoiding the spread of infection.

Help safeguard your establishment from infection with kiosks from Howard and software from 22Miles
