Linewize product suite overview

The most comprehensive K-12 student safety platform on the market

Linewize has built, merged, and acquired technology solutions to create a united product suite with a singular mission: to **protect every child's digital journey at school, at home, and everywhere in between.**

Our technology keeps students safe, enables teachers to educate with ease, and empowers IT directors with data.

Together, these solutions create a global product suite that goes above and beyond our core mission.

School Manager
Hybrid cloud filtering

School Manager is a smart, student safety-focused filter that enables IT administrators to create a low-maintenance filtering ecosystem. School Manager integrates with existing systems, provides support for all end-point operating systems, and offers robust reporting and alerting options.

Classwize
Classroom management

Classwize provides teachers with greater ownership over their lesson plans, easy content control, and real-time screen visibility during class sessions. Granular control makes it possible for teachers to spot distracted students and refocus attention, open and close tabs, chat with the class or specific students, and much more.

Linewize Monitor
Student safety monitoring

Linewize Monitor analyzes more risks in more locations and across more categories than any other solution. It uses AI and human moderation to conduct full-screen analysis of everything a student types, across Google, O365, offline documents, web chat, social media, and more.

Community
Online Safety Hubs,
Parent app, Education

The Community product helps districts educate their community on digital safety through our parental app, custom online safety hubs, and educational resources. Community encourages online safety through collaboration with tools, resources and ongoing education for parents, teachers, and students.

About Linewize

The Linewize ecosystem is a unique response to the challenge of today's connected learning environments. We align a series of products to help districts stay in regulatory compliance, get the most out of their purchased technology, keep kids cyber-safe at school, and impact your parent community by assisting them in raising good digital citizens.
