## ALL-IN-ONE **SECURE MEETING** SOLUTION

Walk up and start your meetings with a one-touch solution that keeps your computer and network secure. Easily access approved apps, view the room's calendar, and start a videoconferencing call, all with one button!

Keep your data, files, and network secure. Launch Control only lets users access admin approved apps and won't let them close out the program. Start a videoconference with a single touch. A Launch Meeting button will open up your UC software of choice, ready to start collaborating.
