

# Visitor

## Instant identity checks for visitors that enter your school

Instantly know every person that visits, and alert authorities when a visitor is flagged during an identity check.

### Features

#### Visitor transparency

Know if an on-campus visitor is a registered sex offender (where supported), has a custody violation, or is on a campus watch list with unbiased and instant identity checks.

#### Facial recognition

Once registered, guests can use facial recognition to quickly sign in every time they visit the campus.

#### Badges and reports

A visitor badge will be printed for all visitors, listing their name, reason for the visit, destination, picture, time and date. Quickly review reports of who visited and how long they were on campus.

#### Alerting

Instantly alert the school security officers via the built-in silent notification system with the tap of a button.
