

HOWARD TECHNOLOGY REAL SOLUTIONS

Temple College in Temple, Texas, founded in 1926

Temple College is a dynamic community college with campuses and centers in Temple, Hutto, Taylor, and Rockdale, Texas. They offer more than 80 degree and certificate programs to students seeking to earn transferable credits, graduate with an associate degree, or complete a certificate for fast entry into the workforce, and are committed to enhancing campus communication and visual engagement through modern technology.

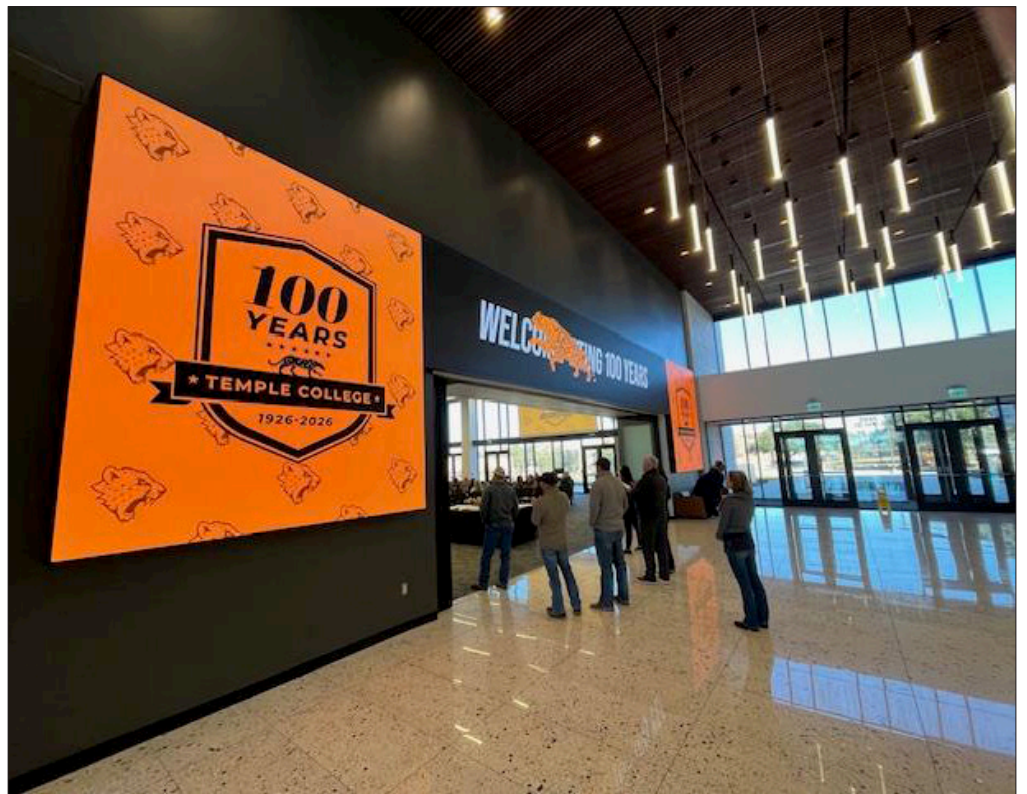

New Era—New Building—New Technology

Temple College recently partnered with Howard Technology Solutions (HTS) to deploy a high-quality dvLED video wall in its newest building for their centennial celebration. It's a new era, but plans for a major technology upgrade have been in the works for a couple of years. The newest of their state-of-the-art facilities is designed to equip students for success in this 21st-century workforce.

This project required a video wall display with large-format, high-resolution, consistent image quality, reliable performance, and a polished look for the ceremony.

In addition to the technical requirements, the project operated under a compressed timeline of less than two weeks, as the video wall needed to be fully installed, tested, and operational before the new building's opening ceremony. The installation also required precise coordination with existing infrastructure.

HTS designed and executed a dvLED video wall installation, including full assembly, mounting, calibration, and commissioning within the accelerated schedule. The solution incorporated dvLED display cabinets, a Peerless AV mounting structure, and a Novastar video wall processor to ensure seamless operation and uniform display performance.

Philips dvLED 6000 Series 1.5mm indoor video wall featuring custom Peerless AV mounting and Novastar H-Series video wall processing.

The installation included unpacking and inspection, precision mounting, module alignment, processor configuration, and final testing. Despite the tight timeline, the team completed the installation efficiently and provided a basic operational overview to ensure the customer was ready for day-one use.

"Everything turned out even better than we expected! The installation process was super-smooth, and the install team finished ahead of schedule. It was a pleasure working with Temple College, and we're looking forward to assisting them with future projects."

Ramez Antoun, Account Manager, TX Higher EDU

The Benefits

- High-impact visual experience that enhances campus communication and engagement
- Professional, modern presentation aligned with the new building's design and purpose
- Reliable, seamless performance with uniform brightness and image quality across the entire video wall
- Confidence for a high-visibility event, with the system fully operational for the building opening ceremony
- Long-term flexibility to support presentations, events, digital signage, and future content needs
- Future Ready!

Howard Professional Services

Call your Howard Rep and see what we can do for you!

Howard Technology Solutions provides a wide range of professional services to an equally diverse set of clients, including educational institutions, medical facilities, businesses, and governmental agencies. We work closely with all our clients, expertly guiding them through the labyrinth of technology to solutions that best suit their needs. From network assessments and wireless surveys to complete audiovisual solutions, installed and configured to your specifications, within your time frame and your budget, Howard can design a solution that fits your requirements—projects of any size, big or small. The Howard AV Team is a total-solution provider, from start to finish.
