

ThinkWrite
Technologies™

OUR STORY

Born from the vision of former school district Educational Technology Director Mike Guerena, ThinkWrite Technologies was founded to provide better solutions for classroom audio needs. With the integral technological guidance from Emmy award-winning audio engineer Mark Howlett, ThinkWrite has developed high quality, value-driven headphones and headsets that not only provide superior user experience, but also withstand the rigors of daily use by students and teachers of all ages and sizes. Since its inception just seven years ago, ThinkWrite Technologies has grown from a family-run business to one of the top selling brands in its category, continually innovating to meet the ever-changing needs of the classroom and beyond.

ELEMENTS OF DESIGN

All ThinkWrite products are developed in-house through a process that incorporates four integral elements of design: durability, comfort, sound, and optimization. These elements combined with data from studies of human head proportions, varying vocal frequencies, and the inner workings of the ear are what make ThinkWrite products unique. Using special lightweight blends of flexible, yet durable materials, each model is made to withstand years of use (and abuse). Ergonomic designs coupled with innovative refined audio curve technology allows for comfortable wear; whether it's for an hour or all day. From special ear cushion contouring to the precision placement of sound drivers, ThinkWrite headphones and headsets are built to optimize the user experience while protecting auditory health.

*COMFORT
THROUGHOUT*

*DURABILITY IN
EVERY DESIGN*

*AUDIO
OPTIMIZATION*

ULTRA DURABLE PRO HEADSET

TW-210 HEADSET (3.5MM TRRS) | TW-220 HEADSET (USB)

The Ultra Durable Pro headset provides a new level of audio quality and unparalleled comfort in a specially designed over-ear model. ThinkWrite's "comfort-first" construction and unique ear cup swivel technology minimize external noise infiltration while the flip-down omni directional microphone boom captures diverse vocal qualities and inflections—out of chewing range. Utilizing sensitive omni capsule technology and 40mm drivers for unmatched sound quality, the Ultra Durable Pro is the optimal over-ear headset for everyday usage, wherever you are.

ULTRA DURABLE PRO HEADPHONE

TW-200 HEADPHONE (3.5MM TRS JACK)

The Ultra Durable Pro TW200 over-ear headphone—featuring unique ear cup swivel technology and improved sonic quality—was designed for a gentler listening experience. The soft-contour, gapless cushion design insulates the ear in 360°, directing audio in towards the ear canal rather than outside of the cup, reducing the possibility of distracting neighboring students. A durable design coupled with 40mm drivers delivering exceptional sound clarity, the TW200 headphones are built for long-lasting, everyday use from the classroom, office, or home.

ULTRA ERGO HEADSET

TW-110 (3.5MM TRRS Jack) | TW-120 (USB)

The Ultra Ergo headset combines our ergonomic-friendly headphones with microphone capabilities for full connectivity and hours of comfort. Equipped with 30mm drivers delivering extraordinary sound, this design provides the ideal amount of compression and frequency isolation for clear audio without applying unnecessary pressure to delicate ears. A flip-down, omni-directional microphone boom positioned optimally for voice recording makes the Ultra Ergo an ideal on-ear headset for school testing, in the classroom and beyond.

ULTRA ERGO HEADPHONE

TW-100 HEADPHONE (3.5MM TRS JACK)

The Ultra Ergo TW100 headphone was designed from the ground up with the singular goal of creating a better sounding, more comfortable headphone. Informed by studies of the average human head proportions, the Ultra Ergo features ergonomically angled ear-cups and an optimized audio curve for continuous comfort and exceptional sound in a lightweight construction—for students of all shapes and sizes. From in-school testing to distance learning, the TW100 will last through everyday usage—a first-rate headphone to keep everyone connected.

ULTRA LIGHT HEADPHONE

TW-50 (3.5MM TRS Jack)

LIGHTWEIGHT
AND DURABLE
PLASTIC FRAME

HI FIDELITY
SOUND QUALITY

CHEW RESISTANT
FABRIC CABLE

ThinkWrite's Ultra Light headphones have been designed specifically for the demands of students in classrooms. The headphone is constructed with a special ABS plastic that ensures maximum lightweight durability. A braided fabric cable prevents damage from even the toughest chewers.

BREAKAWAY ADAPTERS

TW-BC1 (3.5MM TRRS Jack) | 10 Pack

The ThinkWrite BreakAway TRRS adapter helps prevent pin breakage in your devices. Designed with a flexible center, the BreakAway adapter protects devices as a strain relief to mitigate broken headphone and headset jacks, as well as costly device repairs. Sold in packs of 10.

WHAT MAKES ThinkWrite DIFFERENT

ThinkWrite is, above all, a customer-focused company. Every detail of the user experience is carefully considered and enhanced in all of our designs. We don't confuse customers with exhausting lines of the same types of products. Instead, we design the best version possible to make decisions easy and straightforward. We want each and every customer to be fully satisfied with the purchase of our products. To show this, we offer a warranty coverage program; should an issue arise, we only require a photo of the manufacturing defect. We believe every ThinkWrite customer deserves top-quality service and care and welcome any feedback that helps us improve while cultivating audio innovation for the future.
