# The WX390 Workstation

*Blast your way through data-intensive work processes with Howard's newest workstation, the WX390. Increases in both design complexity and workloads for professionals in areas such as architecture, energy exploration, graphic arts, medical imaging, and manufacturing, demand ever-increasing levels of performance, scalability and reliability. Howard's new WX390 is built with that in mind. It's designed to handle professional-grade applications that require tremendous processing power, including 3D CAD-CAM, and CGI. It goes beyond the capabilities of standard computers, with 8<sup>th</sup> and 9<sup>th</sup> generation Intel® Core™ processors that deliver the raw power necessary to get real work done—real fast. And when work is done, the WX390 plays just as hard, so gaming is ultra-fast and super-smooth.*

Affordable? Yes. At a cost of no more than some desktop computers, you can get the right system—Howard's WX390 workstation—at the right price.

*Power up with the WX390 and experience the Howard Advantage!*
