

# Barracuda Essentials Complete

## Comprehensive security and data protection for Office 365

Barracuda Essentials lets you migrate to Microsoft Office 365 safely, efficiently, and economically. It protects your users and your organization from dangerous ransomware and phishing attacks. It also minimizes downtime, ensures compliance with retention requirements, and enables fast, reliable recovery of Exchange Online, OneDrive, and Sharepoint Online data in case of malicious or accidental deletion.

### Comprehensive email threat protection

Today's IT professionals need an easy-to-manage email security solution that protects against phishing, malware, and ransomware. Along with multi-layer email security, the Barracuda Email Security Service provides email continuity and data loss prevention.

Advanced Threat Protection is also included with Barracuda Email Security Service, which sandboxes suspicious email attachments and scans them for malware. Link protection redirects suspicious and typosquatted URLs so malware is never inadvertently downloaded by recipients.

### Archiving for compliance

Barracuda Cloud Email Archiving Service integrates with Office 365 to create a cloud based, indexed archive allowing granular retention policies, extensive search, auditing/permissions, legal hold, and export helping to facilitate e-discovery and retention.

Litigation holds preserve email from being tampered with until the litigation hold expires or is removed. Native and mobile apps provide intuitive interfaces that simplify search to ensure messages are found easily even when email services are unavailable.

### Backup and recovery

While Office 365 is a great option for companies wanting highly scalable and redundant architectures to mitigate natural and mechanical failures, there are inherent risks associated with cloud-hosted data. Human-caused data loss—be it intentional or accidental—still exists as data can still be permanently deleted from cloud applications.

Barracuda Cloud-to-Cloud Backup for Microsoft Office 365 protects Exchange Online mailboxes, SharePoint Online, as well as OneDrive for Business files and folders ensuring recovery in the event of accidental or malicious deletion.

## Technical Specs

### Email Security

- Cloud-based protection against:
  - Spam
  - Email-borne viruses (inbound and outbound)
  - Email-based malware
  - Phishing emails
  - Undelivered emails
  - Unsecured emails
  - Denial-of-Service attacks
- Advanced Threat Protection using full-system emulation sandbox
- Agentless email encryption
- Link and typosquatting protection
- Integrated end-user training and exercises to help identify advanced threats

### Web-Based Management

- Managed via Barracuda Cloud Control
- Convenient configuration and management
- Web-based management portal
- LDAP and multi-factor authentication
- Centrally manage security policies
- Access reports from any location
- Mixed-mode for managing existing Barracuda products

### Archiving

- Archive directly from Office 365 to cloud-based archive
- PST management for legacy email
- Granular retention policies
- Full text search with multiple operators
- Legal hold

### Backup

- Backup and recovery for Exchange Online, SharePoint Online, and OneDrive for Business
- Centralized administration
- Custom retention policies
- Granular scheduling and restores
- Automated or manual backups
- Multi-selection restores
- Granular recovery of SharePoint items
- Restore back to Exchange Online, OneDrive for Business, or download files locally

### Continuity

- Failover to cloud-based email service to continue operations
- Provides email continuity for up to 96 hours
- Emergency mailbox allows users to send, receive, read, and respond to email

### Secure Cloud Data Centers

- AES 256-bit encryption at rest and in transit
- Public key cryptography (RSA 1024)
- File name stripping
- Isolated customer metadata databases
- Redundant storage (geographic or within colo)
- Data stored in-country (based on colo)
- Tier 3 & 4 data centers
- SSAE 16 or SOC audited data centers

### Email Threat Scanner

- Cloud service that scans O365 mailboxes
- Find advanced latent threats
- Provides detailed reports and recommendations
- Free
