Howard A1-Model Telemedicine Kiosk

The Howard A1-Model Telemedicine Kiosk is ideal in stand-alone or physician assisted tele-visits. We offer unique mounting options to support accessories in order to perform the highest level of clinical diagnosis. Our kiosk supports a wide range of self-service use cases including school telemental health programs, community outreach programs, and high patient population services.

Telemedicine Kiosks ensure that physician access is only a video-conference call away.
