

## KIOSK SOLUTIONS

**TABLETOP KIOSKS** are ideal for use in a variety of business applications—airports, banks, libraries, utility companies, and more. They help eliminate long waits and make ordering, updating information, and payment processes smoother, faster, and more secure, all of which contributes to a more positive customer experience. Table-top kiosks are less expensive than full-size models and much easier to move from one location to another as needs dictate. Automation is transforming the way we do business. Let Howard show you how.
