

Protecting students from school to home and EVERYWHERE in between.

The most comprehensive student safety platform on the market.

We've built, acquired, and merged multiple technologies to bring the most comprehensive compliance, student learning, and safety platform on the market. Below you'll find multiple product categories we currently provide best of breed solutions to:

Hybrid Cloud Filter

Linewize School Manager is a Cloud managed, hardware-optional, scalable, multi-OS supporting content filter.

Classroom Management

2 options for different needs:
Classwize - A strong classroom management tool with everything you need!
NetRef - A more premium offering containing advanced reporting and analytics.

Student Safety Case Management

A Student Safety Officer, Counselor, and Principal platform to log, track, and manage alerts and student behaviors.

Student Safety Monitoring

Linewize Monitor was part of the Smoothwall merger. Online/offline 24/7 human monitoring for student safety issues across self harm, depression, grooming, sexual content, bullying, and school violence. Covers Google, 0365, offline documents, web chat, social media, and more.

Parent App

Family Zone Connect App provides visibility and control of devices sent home. Student information system integration associate parents with their students and provides education on how their children use the internet at school.

Digital Safety Education

Family Zone Community helps districts educate their community on digital safety through a cyber safety hub, parent, student, teacher, counselor webinars and more.

What next?

If you would like to arrange a demonstration or book an informal Q&A session for you or your colleagues please contact us.

We'd be delighted to help.
