FUYL Tower 15 Network Kit: 6" (H) x 21" (W) x 19" (D) | 30 lbs
Network switch not included with network kit.

Patent Pending

LocknCharge makes life easier.

Compatible & Efficient Charging.
All compartments are equipped with a power outlet and a 2.4 amp USB port, so you can charge almost any device, including: iPads, tablets, laptops, mobile phones, Chromebooks and more!

Physical and Digital Security.
In addition to physical security, the FUYL Tower's embedded computer automatically applies security software updates as they become available. This feature ensures that for Towers connected to a network, security software is up to date and more prepared against cyber attacks.

Intelligent Remote Management.
Once FUYL Towers are connected to the local network, via Ethernet or Wi-Fi, designated admins can view, access and manage Towers from different locations through the local management portal.

RFID Ready. The FUYL Tower supports almost every RFID standard on the market including HID and MiFare: (MIFARE® Classic, MIFARE DESFire® 0.6, MIFARE DESFire EV1, HID: iCLASS® Standard/SE/SR/Seos; PIV II, Secure Identity Object® (SIO®).

Network Kit

Network Connected.

An optional Network Kit vastly expands the data transfer capabilities of the FUYL Tower 5 and 15 through individual Ethernet connections to each compartment. The Network Kit allows IT Departments to install a network switch to the top of a Tower and connect devices from each bay to a network, making it possible to re-image devices remotely.

Additional Key Benefits

Magical Unicorn Lifetime Warranty. All of our products are now fully backed by a lifetime warranty on the main frame, electrical and all other components.* It's a one-of-a-kind guarantee that's as unique as a magical unicorn.

World-Class Customer Support. Our helpful and friendly Customer Support team will promptly assist with any product issues or questions that may arise.

Two Access Modes. Two Access Modes allow organizations to set the FUYL Tower 5 and 15 to operate with what works best for their workflow. User Specified PIN (USP) Mode means that lockers are open so that the user can reserve a locker, just like a hotel safe. Admin Specified PIN (ASP) Mode puts locker access control in the hands of the Administrator.

Open API. Organizations can build connectors for controlling workflow, including features such as managing admin users, managing event logs, operating doors, changing system settings, restarting the Tower, managing API access and more.

Visibility into Each Bay. Each compartment door has a hardened plastic window for viewing the contents inside. Window-blocking plates are also included for organizations that prefer locker privacy.

Future-Proofed. Software and firmware upgrades are available via the Management Portal.

Active Directory Integration. With the ability to integrate with Active Directory, Tower administrators can log in to the Portal using their username and password stored on their on-premise directory.

4.3" Graphical Color Display. In addition to Online access to the Tower, administrative functions are also available from the LCD Control Module and Keypad. Administrators can unlock, inspect, quarantine, perform diagnostics and reset systems directly from the Tower.

Sleek Design. The FUYL Tower's sleek, minimalist design adapts to any environment.
