

The Leading Identity Management Platform for Higher Ed

QuickLaunch is a zero trust and AI-based identity and access management platform that transforms how cloud-savvy institutions and companies manage IT authentication and access control. More than 500 organizations depend on QuickLaunch as part of their overall cybersecurity protection plan.

Single Sign-On

Improves the student and staff experience by making it easy to get access to the apps they need to learn and work.

- ✓ Built-in app library
- ✓ One click access to all apps
- ✓ Enterprise portal integration
- ✓ 500+ Pre-built connectors
- ✓ Role-based access control
- ✓ Powerful reporting and analytics

Password Manager With MFA

Reduces IT helpdesk interactions by enabling students and staff to reset their own passwords when they forget them.

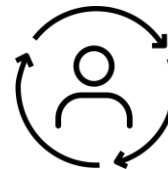

- ✓ Recovery by email, phone, and security questions
- ✓ Multiple active directory support
- ✓ Role-based factor support
- ✓ Configurable password policies
- ✓ Smart helpdesk
- ✓ Powerful reporting and analytics

Adaptive Authentication

Improves cyber security posture by protecting user accounts from being hacked and thwarting ransomware and phishing cyber attacks.

- ✓ Password Manager Integration
- ✓ Role-based Authentication
- ✓ Multiple Authentication Factors
- ✓ Diverse detection criteria (location, browser, device)

Automated Provisioning

Automatically provisions students from the Student Information System and staff from the Human Resources system so they can quickly get access to the apps they need when they matriculate and join.

- ✓ Role-based account provisioning
- ✓ Suspension and restoration
- ✓ Birthright provisioning
- ✓ Time-bound-access
- ✓ De-provisioning and terminations
