

SURGE^X

Protect Your Home Theater Like the Pros

Home theater and residential applications require clean, safe power to perform at their peak. Utilizing the proper power protection and conditioning products is a small price to pay to safeguard this valuable equipment from the unforeseen consequences of power surges and electrical line noise.

SurgeX is used in many of the top arenas, stadiums, and concert halls that absolutely can't afford equipment downtime, and require clean power for pristine AV performance.

Featuring Advanced Series Mode power protection and conditioning, SurgeX safeguards connected equipment from surges, spikes, electrical transients, and noise that can affect AV performance and cause equipment downtime. It is the only technology that eliminates surge energy up to 6,000 Volts does not produce ground contamination to ensure optimal performance.

Expect the same level of reliability, quality and performance as the Pros with SurgeX Home Theater solutions.
